

PROJECT QUESTIONNAIRE

Tell Us More About Your Interests

Thank you for helping our team at Top Flight Technologies learn more about your specific application or partner needs. Please use this brief questionnaire to capture key needs and dimensions of your project and business priorities. Attach any working documents or illustrations that may be relevant to ongoing application discussions.

If you have completed the questions below and have other questions about how we can fast-adapt product solutions for your business need, please contact our customer support team at 774.855.6811, or email us at support@topflighttech.com.

1. Your contact information/company name/business division.

2. What is the focus for your team? – End customer; Service Partner; Channel & Service Partner; R&D, etc

3. Ideally, what do you want to achieve overall; not just with these types of discussions, but what is the outcome you want to drive and see achieved? – Specific UAV applications? Geographic Service or Channel Partnership? Participate in the Airborg Engagement Program?

4. What are the key timelines and operating dependencies do you have to embark on this new solution or partnership?

5. What do you see as your challenges and risk from a process perspective, from an executive sponsorship perspective; and from a budgetary perspective to reaching your goals?

6. For UAV capabilities needed:
 - List types of data to be collected: EO, SWIR, MWIR, LWIR, CO2, gas, wind speed, temperature, etc.

 - Expected operation flight time requirement, expected duty cycle of use?

- Do you require live telemetry?
- Do you require manual, semi-autonomous, or fully autonomous flights?
- Are you aware of the country-specific UAV regulations for > 55lb UAVs and those that operate them?
- Do you require assistance with post-collected data processing (data manipulation, storage analysis)?

9. Your expected project start time frame?

10. Is this project budget already approved?

11. Other miscellaneous information?
